DETAILED ACTION

Response to Amendment and Arguments

1. Applicant's amendment filed on May 30, 2006 has been entered and made of record.
2. In view of applicant's amendment, the 112 first paragraph rejections are withdrawn.

However, new 112 first and second paragraph rejections are applicable due to the applicant's amendments, the details of which are provided below.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 30-32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Referring to claim 30, the phrase "generating all of pixel data, representing pixel values of said high definition video signals" in lines 13-14 is not sufficiently supported by the applicant's specification. More specifically, the applicant's specification does not provide support for generating pixel data of high definition digital video signal that is used to obtain class

data (claim 30, lines 4-5). If Applicant disagrees, he is respectfully requested to point to the exact location in the disclosure where this feature may be found.

Claims not mentioned specifically are dependent from non-supported antecedent claims.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 27-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Referring to claim 27, the phrase "said high definition digital video signal" in lines 13-14 renders the claim indefinite because it is unclear which high definition digital video signal (recited in line 2 or lines 4-5) is being claimed. Appropriate correction is required.

Claims not mentioned specifically are dependent from indefinite antecedent claims.

Allowable Subject Matter

5. Claims 1-26, 33-38 are allowed.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
